

## CONTENTS

List of centres, co-operating hospitals and those responsible for the study . . . . .	5
1. Introduction . . . . .	9
2. The data: general considerations . . . . .	12
3. Down's syndrome (A) . . . . .	22
4. Malformations of structures developed from the neural tube (B1-B7) . . . . .	25
5. Other malformations of the central nervous system (C) . . . . .	35
6. Congenital heart disease (D) . . . . .	36
7. Malformations of the gut (E1-E4) . . . . .	38
8. Defects of the diaphragm (F) . . . . .	46
9. Harelip (G1), harelip and associated cleft palate (G2), and posterior cleft palate (G3) . . . . .	47
10. Talipes (H) . . . . .	55
11. Luxation or subluxation of the hip (I) . . . . .	56
12. Malformations of the limbs and extremities (J1-J7) . . . . .	58
13. Other local and general skeletal malformations (K1-K5) . . . . .	63
14. Malformations of the urogenital tract (L) . . . . .	66
15. Miscellaneous malformations (M) and single-gene traits . . . . .	69
16. Multiple malformations (N) . . . . .	74
17. Minor malformations . . . . .	77
18. Multiple births . . . . .	79
19. Consanguinity . . . . .	88
20. Discussion and summing-up . . . . .	100
21. Future studies of congenital malformations in different countries	103
Acknowledgements . . . . .	106
Résumé . . . . .	106
References . . . . .	108
Annex 1. Cards used for recording of individual births . . . . .	109
Annex 2. Blank forms used for basic tabulations by centres . . . . .	113
Annex 3. Remarks on the interpretation of the data and an explanation as to allocation of cases of malformations in the A-N groups . . . . .	125
